

General and Preventive Dentistry

The only things that every dental care routine will have in common at our office are the regular dental checkups and teeth cleanings. These appointments typically occur every six months, but patients who have periodontal disease or other chronic or health conditions may need to visit us more frequently.

At every checkup, we'll carefully examine your smile and screen for common oral health conditions, such as tooth decay, periodontal (gum) disease, teeth grinding (bruxism), and temporomandibular joint dysfunction (TMD). You'll also receive a thorough, professional teeth cleaning from one of our skilled hygienists and sit down with Dr. LJ one-on-one to discuss your personalized treatment plan.

Oral Hygiene Products

We love seeing our patients' smiles twice a year, but oral hygiene on the other 363 days is up to you. As a partner in caring for your smile, we sell Oral-B

Genius electronic toothbrushes — at a discounted rate — and can prescribe professional grade toothpastes or rinses.

Teeth Whitening

Are you interested in brightening your smile? Ask about our pre-filled whitening trays that will give you results in seven days. We can even create a custom mouthguard if you're looking for a more precise fit.

LET'S STAY CONNECTED

If you haven't already, please check out our website — www.drlijadam.com. Here you will have access to our monthly blog posts (where we discuss a variety of relevant dental topics); have a direct link to our office's Facebook page (which is not only a resource we use to post fun and useful information, but also is a tool to connect and listen to you); and have the ability to leave us a Google+ review (which, if you are comfortable doing, is something we'd greatly appreciate).

TELL A FRIEND

The best compliment you can give is a referral. If someone you know is looking for a new dental office, encourage them to visit our website — www.drlijadam.com — to learn more about us.

LEGACY OF FAMILY, CARING, AND SERVICE

We know that choosing a dental office is an important decision for you and your family. We appreciate you choosing us to care for your smile.

When Dr. LJ's parents started the practice 40 years ago, they were dedicated to providing excellent care to every patient. Under Dr. LJ's leadership, we continue to provide the highest-quality dental care to every patient we see and take pride in combining the latest advancements in dental techniques, technologies, and materials with the best service available.

We pride ourselves on offering our patients the right care, at the right time, at the right price. We customize treatment plans to match your unique needs because we believe it's just as important to care for people as it is to fix teeth.

OUR SERVICES

We treat patients at every stage of dental development and offer a full range of dental services — from routine dental cleanings to full smile makeovers and everything in between.

Dr. LJ knows that the best patients are those who have the education to make treatment options they'll feel completely confident in. We want you to choose the best possible option, but we'll never place pressure on you to pick any one treatment.

BEAUTIFUL RESTORATIONS WITH **CEREC**[®] *ONE-VISIT DENTISTRY*

Digital Impression *No Temporary Crowns* *Same Day Crowns*

CEREC[®] One-Visit Crowns and Bridges

If you need a dental crown or bridge, Dr. LJ is proud to offer same-day service for complete, permanent smile restorations using the state-of-the-art CEREC system. No follow-up appointments. No temporary crown. Just one visit — lasting a couple hours — and you will be on your way.

As one of the few providers offering this service in the Worthington, Freeport, and Butler areas, our office is eager to explain the benefits of CEREC technology with you.

Dental Implants

For patients missing any number of teeth, dental implant-supported tooth replacement may be the best solution. Dental implant posts replace the lost root structure of a missing tooth and offer natural-feeling support for prosthetic teeth.

Whether you're missing a single tooth or a full arch of teeth, Dr. LJ is happy to provide a dental implant consultation.

Sleep Apnea Therapy

Do you hate your C-PAP? Dr. LJ — who has struggled with sleep apnea himself — hated his too. That is why he studied and personally tested various sleep apnea treatment devices.

If you suffer from this common sleep disorder, which can cause an individual to snore loudly and wake up gasping for air, talk to Dr. LJ about your alternatives.

Nightguards for Bruxism

If you grind and clench your teeth during sleep, you may be in for a lifetime of dental chips, cracks, and other wear. Dr. LJ can help you prevent this damage with a comfortable, custom oral appliance, that when worn nightly, can save you from a lifetime of oral health concerns.
